

do you have
the next

Big Idea?

share it with our
community!

HOST Park
nelha.hawaii.gov

What can you make using the ocean, wind or Sun as an energy source?

Partnering up with **Hawaii Keiki Museum**, **NELHA** is seeking innovative and creative displays using what we have plentiful of: sun and sea.

Create a 3D diorama, architectural model or an interactive exhibit of anything related to using sustainable energy resources like the wind, solar or even the ocean.

Your masterpiece will be at the Hawaii Keiki Museum with your photo and bio credits on display.

Where to get ideas?

If you have an idea what you're thinking of but need examples, check out [Science Buddies.org](http://ScienceBuddies.org), education.com/science-fair or even Pinterest.

There's a load of good ideas on the internet -just make sure it's something that is manageable and related to the required theme.

Do you have the next big idea that is sustainable, earth-friendly and can help our community?

Show it to the world!

Questions? Email Rae at rae.tt.nguyen@hawaii.gov. Visit nelha.hawaii.gov and click on "School Tours" for more info.

Share it with our community!

Send photos of your entry to HOST Park along with a project description, photo and a bio of yourself.

We will notify you once our group of judges chooses who the winner is.

Winners will be featured in HOST Park's newsletter, *The Pipeline*, posted on NELHA's various communication and social platforms and at Hale Iako's Public Service Announcement board.

Winners will also have their photo and bio on display at the Hawaii Keiki Museum.

rules:

- Open to all ages from grades K-12.
- The theme must be energy-related. It can be wind, solar or ocean.
- Your project can be a diorama, 3D model or an interactive exhibit. No poster boards, please! Jazz it up! It should be engaging for all ages.
- There's no limit on size but be mindful that it'll be for a museum exhibit for everyone to see and touch.
- All work must be original and needs to be done by you. Family and friends can certainly help.
- Materials cannot be flammable, combustible or organic. Must be sturdy and durable to withstand tiny hands.
- Think PG - nothing vulgar or foul should be on your project.
- There is no deadline and submissions are accepted year-round.
- Depending on the number of entries received and how awesome the project is, NELHA and Hawaii Keiki Museum has the right to showcase two or more displays in the same shared space.
